Research Experience

Research Assistant to Stephen Machin, LSE

Sep 2024 - Present

- Building and linking large-scale administrative datasets (~20M observations) to evaluate immigration and labor policy effects on employment in the UK care sector.
- Cleaning, harmonizing, and documenting worker- and firm-level microdata; producing extensive descriptive and summary statistics to validate data integrity.
- Applying difference-in-differences models with worker and firm fixed effects to quantify policy impacts of shifts in UK immigration law.

Research Assistant to Matthias Doepke, LSE

Oct 2025 – Jul 2026

- Contributing to theoretical and empirical modeling of fertility decisions and gender norms within dynamic household optimization frameworks.
- Analyzing the political economy of female labor protection laws, focusing on trade-offs between household welfare gains from women's employment and opposition arising from increased labor market competition.

Senior Research Analyst, The Brattle Group

Sep 2021 - Sep 2024

- Led econometric and DCF modeling for antitrust and IP cases. Estimated treatment effects and counterfactual outcomes under alternative market structures.
- Co-authored working paper quantifying reparations for transatlantic chattel slavery; integrated historical and macroeconomic data to estimate counterfactual GDP per capita.
- Built large-scale datasets (10M+ obs) from public and proprietary sources to evaluate anti-competitive behavior and consumer welfare.

Research Fellow, Columbia University

Jun 2020 - Dec 2024

- Conducted quantitative and qualitative analyses of health and sanitation policies in the US, Senegal, India, and Kenya.
- Published in peer-reviewed journals including *Health and Human Rights* and *PLOS Global Public Health*.

Research Assistant to Daniel Deibler, Columbia University

Apr 2020 - May 2021

- Estimated causal effects of legal employee classifications to analyze the impact of U.S. labor law on unemployment, wages, and inequality.
- Constructed and hand-coded a novel panel of 2,000+ U.S. labor law rulings on worker classification and welfare protections.
- Managed data cleaning, variable construction, and documentation for replication and robustness testing.

Publications

Working Papers
